Chair's Letter

Dear Members and Friends of China Specialty Group,

Time flies, and it's the AAG conference abstract submission time again! I hope that you are enjoying the Fall weather and have submitted the abstract for the 2019 AAG meeting in Washington DC. We have received requests of session co-sponsorship by multiple specialty groups, indicating the growing interaction between China studies and other fields.

To reiterate, the missions of China Specialty Group are fourfold: (1) to promote the study of the geography of China; (2) to serve as a clearinghouse of information for persons interested in Chinese geography; (3) to encourage professional activities including development of research projects and dissemination of research results; and (4) to increase contacts with China geographers outside North America. With your continued support, China Specialty Group is among the largest country or region-based specialty groups in the AAG. Our group has retained and recruited more engaged members. We organized successful Business Meetings and Get-together dinner events in AAG conference. We have enhanced communications among our members through the publication of newsletters. Social media platforms have also been established to increase the awareness of our cherished China Specialty Group.

There are several things that we can do together to increase our group's visibility. First, if you are organizing session and/or panel related to China, please consider seeking sponsorship from China Specialty Group. Second, students please consider participating in competitions that CGSG organizes, including best student paper award, student travel awards, best illustrated paper/poster award. For details and submission deadlines, please check the announcements sent through the AAG Knowledge Community and our China Geography Listserve (cgsg-l@uleth.ca). Faculty colleagues, please encourage your students to participate.

Third, please mark your calendar for our annual big event CGSG Plenary Session, which will be delivered by Professor Jianguo Liu, Rachel Carson Chair in Sustainability and University Distinguished Professor of fisheries and wildlife at Michigan State University, titled "China's Environment in a Metacoupled World". In the past four decades, China's economic miracle has been shadowed by many environmental challenges with global implications. This talk will highlight long-term trends and consequences of China's major environmental issues, such as air pollution, biodiversity loss, climate change, land degradation, and water pollution and shortages. It will illustrate their driving forces across a metacoupled planet with human-nature interactions within and among countries. The talk will also show some achievements and ongoing efforts of environmental protection. It will focus on the long-term interdisciplinary study on "Pandas, People, and Policies". Finally, the talk will end with suggestions for an environmental revolution to fundamentally improve the environment in China and beyond.

On behalf of this year's China Specialty Group Executive Committee (Max, Shenjing, Yi, Jiang and myself), it has been a gratifying experience to serve you. We look forward to seeing you all in Washington DC!

Please our specialty group's website for more updates:
http://cgsg.geo.msu.edu

Best Regards,
Xinyue Ye
Chair, China Specialty Group

CGSG Annual Student Paper Awards

Eligibility:

- Student members of the CGSG at all academic levels (undergraduates or graduate students) are qualified.
- The student must be the sole author and presenter of the paper.
- Multiple submissions to more than one specialty group for a Student Paper Award is NOT allowed. Papers being considered by other AAG specialty groups for a student Paper Award are not qualified for the CGSG Student Paper Award.
- Participants must have submitted the abstract and appropriate program participation fee to the AAG for participation at the AAG Annual Meeting , Washington DC, April 3-7, 2019.

Award:

- A $300 prize will be awarded for the best paper, in addition to an award certificate and prepaid lunch at the AAG Awards Banquet.
- Two Travel Awards of $150 each will go to the First and Second Runner-up.
- A committee of faculty from the China Specialty Group will evaluate the papers. Evaluation criteria for the award include the originality of the research, the soundness and creativity of the research design and methodology; the validity of conclusions; and quality of the presentation.

- The award will be announced at the Business Meeting of the CGSG in Washington DC in April 2019, and published in the CGSG and AAG newsletters.

Guidelines for Submission:

- To be considered for the competition, authors should e-mail a copy of the paper's title and abstract to the CGSG Chair by January 1, 2019.
- Please include author's name, academic level (undergraduate, master's, or doctoral), academic institution, department or program, current address, phone number, and email.
- An electronic version of the paper, in Word format, must reach the Chair no later than February 15, 2019.

Announcements

- **Student Awards in the AAG annual conference in 2018, New Orleans**

The annual awards to recognize distinguished student research and paper presentations at a CGSG-sponsored session at the annual meeting were presented at the annual Business Meeting of the CGSG in New Orleans:

- The Best Student Paper Award went to Xiao Han, School of Geography, University of Melbourne, for her paper entitled "From Chinese dam building in Africa to the Belt and Road Initiative: Inclusiveness of whom/what?"
- Two competitors won travel awards: Siyu Cai, UCLA, for "China's Belt and Road Initiative: Connectivity, Place, and Positionality" and Yi Yu, University of Oregon, "can care ethics facilitate a more just society? a case study based on caregivers in China".

The Hong Kong-Zhuhai-Macau Bridge was opened on October 24, 2018. This 55 kilometers (34 miles) long bridge connects roughly 70 million people in 11 cities.

Member News

Guo Chen (MSU) has competed a one-year Wilson Center Fellowship in DC and continues to take a sabbatical to work on manuscripts and a documentary on slums and recycling. The fellowship selection is a multi-tiered process-internal and an external panel of experts made up of academic and practitioner experts - as well as the Fellowship Committee of the Board of Trustees who come from academia, business, and government and have final approval. It is a highly competitive process. Please check out Guo's media interview and articles on migrant slums in the face of China's trash import ban and low-end population crisis at https://www.chinausfocus.com/author/20453/guo-chen.html and https://www.newsecuritybeat.org/author/gchen/

Cindy Fan (UCLA) has published two book chapters in the SAGE Handbook of Contemporary China and Modernity, Space and Gender, and she has co-authored three papers in EPA: Economy and Space, Geoforum, and Area Development and Policy. She has given invited talks at Xi'an Jiaotong University, Shanghai University, Southwestern University of Finance and Economics, and Sister Cities of Los Angeles. As Vice Provost for International Studies and Global Engagement, she led two UCLA Chancellor's trips over the summer, where over 800 alumni, students and friends attended UCLA Global Forums and receptions in Hong Kong, Taipei, Beijing, Seoul, Tokyo, Bangkok, Manila, Jakarta and Singapore. She also received a US$1 million gift to launch a new Global Executive Leadership program.

Tyler Ross Harlan (UCLA) started as a postdoctoral fellow in the Atkinson Center for Sustainability at Cornell University in January. He is based in the Department of Development Sociology. He is launching a new research project at Cornell entitled "A Green Belt and Road? Renewable Energy and Development Models on China's Southwest Borderlands", which will analyze China's 'green' cross-border investments in Laos and Myanmar. He conducted preliminary research in Yangon and Vientiane this summer. He is co-organizing (with Alex Wang, UCLA Law) a panel and paper session at the 2019 Association of Asian Studies meeting in Denver on the environmental aspects of China's Belt and Road Initiative.

Shenjing He (The University of Hong Kong) was promoted to Professor in August 2018. She was awarded a general research grant from National Science Foundation of China to launch a new project to look into the development mechanism of low-income housing and its integrative effects in urban China.

Youqin Huang (University at Albany, SUNY) was promoted to Professor this year. She is working on an edited volume titled "Chinese Cities in the 21st Century" for Palgrave and McMillian, and two Special Issues on housing in the journal of "Cities" and "Housing and Built Environment" (with Dr. Shenjing He and Dr. Li Gan).

Ron Knapp (SUNY New Paltz) has a Chinese language translation of his book *Chinese Houses: The Architectural Heritage of a Nation* with the title *Tushuo Zhongguo minju* (طِ Ţ طِ) published this fall by Sanlian Publishing in Beijing. One disappointment was that the boyhood homes of Mao Zedong, Liu Shaoqi, and Deng Xiaoping were not included in the book. These significant homes can be viewed via the Look Inside feature of amazon.com. Knapp will be giving a talk titled "Forgotten, Lost, & Reborn: Long-Span Timber Covered Bridges in the USA" at the 2nd International Symposium on Protection and Utilization of Wooden Architecture Cultural Heritage in Ningbo at the beginning of December.

Member News, continued

Wei Li (Arizona State University) is a member of Honors Committee, AAG in 2016-2019 and elected as the Chair in 2018-2019. She was invited to speak at Ryerson University, Canada and UCLA, USA; one is about "Intellectual Migration and Brain Circulation: Conceptual Framework and Empirical Evidence", another is about "Chinese and Indian Immigration to the U.S.: Demographic, Socioeconomic Profiles and New Minority Depository Institutions". With Kanika Bakshi, Yining Tan and Xuanyu HuangIn, she gave presentations around "Policies for Recruiting Talented Professionals from the Diaspora: India and China Compared" at two forums (The 6th Migration Law Forum and the 2018 Conference on International Migration, Immigration Law and Global Talent Mobility) in China. In April 2018, she co-organized a sub-conference ("Internationalization of Higher Education and Transnational Skilled Migration" at AAG.

Yansui Liu (Center for Regional Agriculture and Rural Development IGSNRR CAS) won the Science Award of the Third World Academy of Sciences for his achievements in the research field of rural development and land use in China on December 13th, 2017. In June 2018, he was awarded the title of "Leading Talent of the Advanced and Innovative Science and Technology Talent Training Project of the Ministry of Natural Resources". Later in August, he also won the National Innovation Award for Poverty Alleviation as the leader of third-party evaluation expert group to evaluate the results of the national targeted poverty alleviation work. He now is presiding over two major tasks entrusted by the Central Government of China, including *the Third-Party Evaluation project about the Effectiveness of the National Targeted Poverty Alleviation Work* and *the Launch of the National Key R & D Program and the Key Projects of Natural Science Foundation of China*. Besides, Yansui Liu and an associate researcher Li Yuheng publish a paper, "Revitalize the World's Countryside" in the journal *Nature* in 2017 (See full citation below). In March and August, he has attended several conferences and gave speeches and report, e.g. the 2018 World Bank "Land and Poverty" Conference and the International Geographical Union (IGU) 2018 Regional Conference, respectively. In April, Yansui Liu was also invited to host the sub-forum "Farmers and Rural Areas in transition" of Boao Forum for Asia Annual Conference 2018. Recently in October, he co-hosted the Second IGU-AGLE Conference and visited the Polish Academy of Sciences.

Yi Liu's (Sun Yat-sen University) paper (LIU Yi, Bao Jigang, Zhu Yilin. 2017. Exploring Emotion Methods of Tourism Destination Evaluation: A Big-data Approach, *Geographical Research*, 36(6), 1091-1107.) has been awarded as the second-tier excellent research by Ministry of Cultural and Tourism of China on 20th April. In this paper, Liu develops a sentiment-analysis model to evaluate tourism destinations based on user generated contents in tourism social media.

Gustavo de L. T. Oliveira (University of California, Irvine) was appointed Assistant Professor of International Studies at the University of California, Irvine, but he is spending the 2018-2019 academic year as Visiting Assistant Professor of Geography at the College of Urban and Environmental Sciences, Peking University. He was invited to present his paper "Boosters, brokers, bureaucrats, and businessmen: Assembling Chinese capital with Brazilian agribusiness" at the 6th Shantou University Global Studies Symposium, "Connecting Personal, Local, and Global", in Shantou, Guangdong, and he was invited to deliver a public lecture at Drexel University, Philadelphia, on "Transnational agribusiness and Orientalism in Brazil, 1807 – 2017." He was also invited to lead a workshop with PhD students on "Collaborating with social movements/NGOs and conducting politically-sensitive research" at the University of Georgia, Athens, and to contribute to the workshop "China's Belt and Road Initiative: Views from the Ground", jointly organized by colleagues at James Madison University and the University of Colorado at Boulder.

Member News, continued

Juha Ilari Uitto (Independent Evaluation Office, Global Environment Facility) organized a session on 'Integrating Big Data in Evaluation' in the 2018 Asian Evaluation Week with the objective of enhancing the applications of big data and geospatial analysis in evaluating environmental and socioeconomic impacts of development interventions. The session drew primarily upon experiences with the Global Environment Facility (GEF) and the German Institute for Development Evaluation (DEval). It was well attended and generated a good discussion on the potentials. He also participated as a panelist in a plenary session organized by the World Bank on 'Data and Evidence: Creating a strong foundation for development policy and effective program implementation.'

Yehua Dennis Wei (University of Utah) is co-PI for a NSF grant on comparative regional inequality dynamics. He is editing a special issue on urban inequality for Applied Geography. His special issue titled Urban Expansion, Sprawl and Inequality has been published in *Landscape and Urban Planning* (See full citation below).

Xinyue Ye (New Jersey Institute of Technology) has relocated from Department of Geography at Kent State University to College of Computing at New Jersey Institute of Technology. He also serves as the founding director of Urban Informatics & Spatial Computing Lab and Core Faculty of Center for Big Data. Currently he works on two NSF grants and one National Institute of Justice grant: "Spatiotemporal Modeling of Human Dynamics across Social Media and Social Networks", "GeoVisuals Software: Capturing, Managing, and Utilizing GeoSpatial Multimedia Data for Collaborative Field Research", and "Using Sentiment Analysis and Topic Modeling in Assessing the Impact of Police Signaling on Investigative and Prosecutorial Outcomes in Sexual Assault Reports".

Yu Zhou (Vassar College) has become the principal investigator of the project, a four-year implementational institutional grant from Luce Initiative on Asia and Environment focusing on environmental science collaboration with Chinese universities. Four summer workshops will be conducted in Shanghai and Wuhan with East China and Central China Normal University on water and land-related questions. Among other individual publication, Yu Zhou, George Lin and Zhang Jun is delighted that Urban Studies has accepted their commentary "Urban China through the lens of neoliberalism-is conceptual twist enough?" (See citation below.) The commentary reflects the discussion in five related sessions on this topic during AAG meeting in 2017.
